Professional Summary

I am a data analytical professional with a bachelor's degree in statistics and over one year of experience in data analytics, ICT support, and analytical reporting across regulated and operational environments. I perform data validation, dashboard development, structured reporting, and system support to enable data-driven oversight and decision-making. I have a strong written communication, attention to data integrity, and a disciplined approach when it comes to risk-based supervision, regulatory reporting, and achieving public-interest objectives.

Skills

Data Analytics & Reporting:

- Data extraction, cleaning, validation, and reconciliation
- SQL, Advanced Excel, Power BI dashboards & reports
- Data quality checks and timeliness monitoring
- Analytical reporting and management briefs

Systems & ICT Support:

- First-line user support (internal and external users)
- ICT troubleshooting, system configuration & documentation
- Incident tracking, preventive maintenance & service reporting

Regulatory & Operational Support:

- Data templates and reporting logic design
- Process improvement and automation opportunities
- Research on emerging technologies (AI, ML, analytics)
- Risk awareness, data governance & confidentiality

2008 – 2015, Grade: 383/500

Work History

Sales Admin and Data Analyst
Medscribe Ltd, Nairobi
March 2026 - Presesnt

- Built a data function from the ground up for a pharmaceutical distribution company across Kenya, Tanzania, and Uganda
- Designed 8 interactive Excel dashboards with dynamic slicers and pivot charts tracking sales performance across 4 financial years (FY 2023-24 to FY 2026-27)
- Developed a full sales forecasting model including 3-month rolling averages, TGT vs ACH charts, and brand-level breakdowns
- Automated three reports, including a daily sales running balance report using Macros, eliminating manual compilation
- Performed data validation, budget data entry, and cross-market discrepancy resolution across East Africa markets

ICT Intern
MPSHAH Hospital, Nairobi
September 2025 – March 2026

- Conducted Turnaround Time (TAT) surveys and perform data extraction and analysis using SQL and Power BI, producing structured dashboards and analytical reports to support operational oversight and performance monitoring.
- Prepared periodic analytical reports and presentations for management to inform service optimization and decision-making.
- Support system users through first-line ICT support, troubleshooting hardware and connectivity issues while maintaining incident and resolution records.
- Performed preventive maintenance and system checks, compiling maintenance reports to support continuity and operational resilience.

- Participated in institutional projects, including data entry, validation, and training, supporting structured data collection and accuracy.

Business Analyst and Marketing Intern

Jubilee Insurance, Nairobi

June 2024 – December 2024

- Supported data consolidation and validation by merging datasets to improve the accuracy and efficiency of Power BI analytical presentations.
- Conducted analytical research and reporting to support management decision-making on product performance and strategic initiatives.
- Prepared structured reports and briefing materials summarizing findings for internal stakeholders.
- Participated in cross-functional meetings, communicating data-driven insights to support strategic planning.
- Contributed to ESG and CSR reporting, demonstrating awareness of governance, impact measurement, and accountability.

Data Analyst Intern

Tuffsteel Limited, Nairobi

September 2023 – February 2024

- Analyzed operational and logistics datasets to support cost monitoring and efficiency improvements.
- Maintained accurate and timely data records, ensuring the integrity of operational datasets.
- Analyzed fuel consumption and fleet performance data, identifying trends to support management decisions.
- Supported procurement and logistics teams through data tracking and reporting to minimize operational risk.

Business Analyst Intern

Simba Corporation Limited, Nairobi

May 2023 – August 2023

- Cleaned, validated, and prepared multi-departmental datasets using Dynamics 365.
- Developed Power BI dashboards to support sales monitoring and management reporting.

- Analyzed trends and prepared structured analytical summaries for internal decision-making.
- Communicated findings clearly during cross-departmental meetings.

Volunteer Work

Community Research Volunteer

Shangilia Road Community, Katani-Syokimau

March 2024

- Spearheaded a research study to determine the population within the Shangilia Road community.
- Designed and implemented data collection methods to ensure accurate population assessment.
- Engaged with residents and community leaders to gather insights and verify data.

Impact & Achievements:

- Provided critical data used to guide the development and improvement of Shangilia Road.
- Assisted in the fair allocation of contributions among different gated courts.
- Strengthened community collaboration by fostering discussions on infrastructure planning.
